

K&R Bedspread's Workroom

Visual inspection of every yard of fabric that goes through K&R's workroom is just the first of many steps we take to ensure every order is to the highest quality.

K&R's custom bedding and drapery sewers are well trained and pay attention to every detail. Normal turnaround for individual sets are 2 weeks from the time we receive fabric

To make your favorite fabric's pattern stand out, K&R uses oversized hand guided quilting machines. Bedspreads and coverlets can be finished to any size and any style of your choice.

The vertical tabler is used to create perfectly sized drapery to almost any useful size imaginable. The ability to cut more than 20 feet of drapery at one time makes K&R the choice when accuracy and speed count.

Our computerized sewing machine can sew a dozen perfectly shaped patterns on your coverlet or bedspread.

We are located in a 40,000 square foot production facility and showroom located in the heart of Salt Lake City's historic furniture manufacturing area. More than 20,000 yards of designer fabric and a 2,600 square foot showroom feature some of the beautiful possibilities K&R can manufacture. Showroom is open to the public and to the trade with interior designers on staff.
